Professional Summary

Senior software engineer with more than 20 years across three areas that overlap more than they look: enterprise development in SAP, full-stack web engineering, and the technology behind holiday-rental booking platforms.

In SAP I work with ABAP Objects, CDS, OData, RAP, CAP and BTP on S/4HANA, with Clean Core and extensibility as the guiding line. On the web side it is TypeScript, React, Node.js, PHP and Drupal, with REST APIs and relational data models underneath.

What connects them is modernization: taking a system that has grown for years - a Dynpro application, a Drupal estate, an undocumented business rule - and rebuilding it into something maintainable without stopping the business. AI-assisted codebase analysis is part of how I do that today.

Core Strengths

- SAP development: ABAP, ABAP Objects, CDS Views, OData v2/v4, RAP, CAP, SAP BTP, UI5, Fiori Elements, S/4HANA extensibility and Clean Core.
- Web engineering: TypeScript, React, Next.js, Node.js, PHP and Drupal, with REST API design and relational data models.
- Travel technology: nearly two decades on a holiday-rental platform - property data, availability, enquiry and booking flows, partner integration.
- Enterprise integration: API contracts between systems, and hypercare for productive interfaces in financial environments.
- Modernization and refactoring of grown systems, with tests and written architecture decisions to protect the change.
- Linux administration, LAMP and cloud-oriented infrastructure, Git-based delivery.
- Clean Code, SOLID, code reviews, architecture documentation, Scrum (PSM I), and remote collaboration across time zones in German and English.

Professional Experience

Technical Lead / IT Specialist, Ferienhausvermittlung fincaferien **03/2025 to Present**
Düsseldorf, Germany

Technical lead for the rescue and modernization of a multisite holiday-rental platform that runs seven booking websites for the Balearic and Canary Islands.

- Go-live of the modernized platform on 6 September 2026: all seven booking sites running on the new cloud infrastructure, migrated without downtime.
- Repaired and stabilized the availability, enquiry and booking workflows after five years without maintenance.
- Moved the platform to a cloud-hosted infrastructure with separate development and production environments and a documented deployment path.
- Rebuilt the integration layer between property data, partner systems and the CMS as documented REST APIs instead of point-to-point calls.
- Reconstructed the logic of undocumented custom modules for inventory, pricing and enquiry handling, with AI-assisted code analysis to speed up the work.
- Set the modernization roadmap together with the owners and translated business goals into a step-by-step technical plan.

Technologies
Drupal 7, PHP, MySQL/MariaDB, REST APIs, Linux, Git, cloud infrastructure, AI-assisted code analysis.

Senior SAP Developer, intecsoft GmbH & Co. KG **01/2025 to 09/2026**
Dresden, Germany

Senior SAP development role focused on modernization, integration and software quality in S/4HANA projects.

- Improved and extended backend API interfaces in an S/4HANA customer project in SAP PSM (Public Sector Management) to support integration and system readiness.
- Developed and extended the intecsoft SAP solution Collection Sense FI and supported its productive web services and API interfaces during hypercare.
- Refactored an undocumented SAP Business Suite Dynpro application into object-oriented ABAP to improve maintainability and S/4HANA readiness in IS-U.
- Aligned implementation with business teams, solution managers and developers.

Technologies
ABAP Objects, ABAP SQL, CDS Views, OData, SAP BTP, REST, Fiori/UI5, S/4HANA, Clean Core.

SAP Technical Consultant, BA Business Advice GmbH **02/2022 to 12/2024**
Oldenburg, Germany

SAP consulting and development across ABAP, UI5, Fiori, S/4HANA, SAP BTP and modern extension models, delivered on site and remote for national and international customers.

- Developed custom Z applications in S/4HANA with object-oriented ABAP, CDS Views and OData services.
- Worked in the cloud expert team for S/4HANA Cloud Public Edition: developer extensibility, key user extensions and side-by-side extensions on SAP BTP.
- Built CAP applications on SAP BTP and Fiori frontends hosted in S/4HANA Cloud.
- Built UI5 Freestyle and Fiori Elements applications, including SAP MII scenarios.
- Contributed to ERP to S/4HANA migrations and applied ABAP Clean Core principles to custom code.
- Delivered in the project areas PPDS, QM, LE and PM.

Technologies
ABAP, ABAP Objects, CDS Views, OData v2/v4, RAP, CAP, SAP BTP, SAP UI5, Fiori Elements, SAP MII, S/4HANA Cloud Public Edition, JavaScript, TypeScript, Jest.

Software Developer and Linux Administrator, Sengicon GmbH **02/2021 to 01/2022**
Germany

Full-stack development in an Industry 4.0 environment: React frontends, PHP backends, REST APIs and Linux infrastructure.

- Rebuilt an outdated PHP web application into a modern PHP REST backend with a newly built React frontend.
- Developed React user interfaces and refactored existing PHP applications.
- Designed database schemas and data models in MySQL, MariaDB and PostgreSQL.
- Wrote tests with PHPUnit and Jest.
- Installed, configured and administered Linux VMs and LAMP stacks.

Technologies
React, JavaScript, PHP, REST, PHPUnit, Jest, Linux, Apache, MySQL, MariaDB, PostgreSQL, Composer.

Webmaster / Web Developer, Ferienhaus-Vermittlung fincaferien.de GmbH **04/2002 to 12/2019**
Bockenem, Germany

Nearly two decades of technical responsibility for one of the first German online agencies for holiday homes on the Balearic and Canary Islands, active in the market since 1998. Started in 04/2002 as a part-time role of about ten hours per week alongside my apprenticeship as an Industrial Clerk, with full technical responsibility from 04/2004.

- Built and maintained the property, enquiry and booking websites with PHP, Drupal 7, HTML and CSS.
- Introduced Drupal 7 development with Git and Jira from 2015 and moved the sites onto it.
- Managed property content, photo material and site structure for the rental portfolio.
- Increased organic traffic through technical SEO, page performance and usability work; ran search engine marketing and usability optimization from 2012 to 2017.
- Ran the office network and IT infrastructure alongside the web work.

Technologies
PHP, Drupal 7, HTML, CSS, JavaScript, MySQL, Git, Jira, Linux, Samba, SEO/SEA.
