German citizen with unrestricted work and residence permit in Brazil. Senior software engineer with 20+ years of experience in full-stack web development and recent specialization in modern SAP full-stack development, including SAP BTP, S/4HANA modernization, ABAP, CDS, OData, Fiori/UI5, and API integration.

Focused on scalable business applications, Knowledge of clean architecture and SOLID principles.

Professional Summary

Senior Full-Stack Developer with 20+ years of experience in software engineering and focused on modern specialization in SAP full-stack development across SAP BTP, S/4HANA, ABAP, CDS, OData, and Fiori/UI5.

Early adopter of modern SAP technologies including RAP, CAP, ABAP Cloud and SAP BTP. Strong conceptual understanding and hands-on experimentation combined with extensive experience in enterprise software architecture, API integration and full-stack development.

Strong background in modernization projects, S/4HANA readiness, API integration, and clean, maintainable enterprise application development. Combines SAP backend and extension expertise with modern web engineering in JavaScript, TypeScript, React, Node.js, and REST-based integration.

Experienced in refactoring legacy applications, supporting migration initiatives, and delivering clean-core aligned solutions for scalable business environments. Brings a quality-first mindset with emphasis on maintainability, clean code, architecture, refactoring, and production-ready solutions and durable engineering quality rather than quick fixes.

Selected SAP-Relevant Highlights

- SAP full-stack development with ABAP, CDS Views, OData, Fiori/UI5, RAP, CAP, and SAP BTP
- S/4HANA modernization, migration support, clean-core aligned extension, and legacy application refactoring.
- Enterprise API integration across SAP and external platforms using REST and service-oriented architecture.
- Strong additional background in JavaScript, TypeScript, React, Node.js, PHP, Drupal, Linux, and cloud-oriented infrastructure thinking.
- Quality-focused engineering with emphasis on clean code, SOLID principles, maintainability, code reviews, and sustainable architecture.

Professional Experience

Senior SAP Developer, Intecsoft GmbH & Co
Dresden, Germany

01/2025 to Present

Contract-based SAP development role focused on modernization, integration in S/4HANA-related projects.

- Improved backend API interfaces in an S/4HANA project to increase integration readiness and maintainability.
- Supported productive web services and API interfaces during hypercare in the FI environment.
- Refactored a SAP Business Suite Dynpro application into object-oriented ABAP for better maintainability and future S/4HANA compatibility in an IS-U context.
- Worked closely with business stakeholders, solution managers, and developers to align implementation with functional requirements.

Technologies

ABAP Objects, ABAP SQL, CDS Views, OData, SAP BTP, REST, Fiori/UI, S/4HANA, Clean Core

Martin Grellmann - Senior Full-Stack Engineer | SAP BTP | S/4HANA | Enterprise APIs | Clean Core

**Technical Lead / IT Specialist, Ferienhausvermittlung fincaferien
Düsseldorf, Germany**

03/2025 to Present

Lead technical modernization and digital transformation of a multi-site vacation rental platform (Drupal-based).

- Designed and implemented a cloud-based infrastructure strategy to improve scalability and maintainability.
- Designed modernization roadmap for legacy Drupal platform architecture, including API-driven integrations and service-oriented design.
- Developed and integrated enterprise APIs connecting business services with Drupal CMS.
- Drove digitalization initiatives across booking, content, and operational workflows.

Technologies

Drupal, PHP, cloud infrastructure, REST APIs, automation, web technologies

**SAP Technical Consultant, SAP Full-Stack Development, BA Business Advice GmbH
Oldenburg, Germany**

02/2022 to 12/2024

SAP consulting and development with focus on ABAP, UI5, Fiori, S/4HANA, SAP BTP and modern extension models.

- Developed and enhanced SAP applications using ABAP, CDS, OData, and UI5.
- Contributed to ERP-to-S/4HANA migration projects and MII-related work.
- Refactored existing applications to improve maintainability, future readiness, and architectural quality.
- Built UI5 Freestyle and Fiori Elements applications.
- Worked on side-by-side and developer extensibility scenarios in S/4HANA Public Cloud.
- Used JavaScript, TypeScript, and Jest in SAP frontend development.
- Contributed to initiatives involving SAP BTP, RAP, and CAP.

Technologies

SAP ABAP, ABAP CDS, OData v2/v4, SAP UI5, Fiori Elements, RAP, CAP, SAP BTP, S/4HANA Public Cloud, JavaScript, TypeScript, Jest.

**Software Developer and Linux Administrator, Sengicon GmbH
Leipzig, Germany**

02/2021 to 01/2022

Full-stack development in an Industry 4.0 environment with React frontends, PHP backends, API integration, and Linux-based infrastructure. Distinguished myself in particular by successfully converting an outdated PHP web application to a modern PHP REST backend with a connection to an independently created new React-Web-Frontend including Database modelling .

- Developed React-based web frontends.
- Refactored and modernized existing PHP applications.
- Built and integrated REST-based APIs with PHP.
- Modeled databases with MySQL, MariaDB, and PostgreSQL.
- Performed testing with PHPUnit and Jest.
- Installed, configured, and administered Linux and LAMP environments.

Technologies

React, JavaScript, PHP, REST, PHPUnit, Jest, Linux, Apache, MySQL, MariaDB, PostgreSQL, Composer.

**Training Full-Stack Web Developer at Intecsoft
Leipzig, Germany**
