Professional Summary

Senior SAP developer with a focus on ABAP Objects, CDS, OData, RAP, CAP and SAP BTP, backed by more than 20 years of full-stack engineering.

I build custom applications and extensions the way SAP intends them today: business logic in clean object-oriented ABAP, data exposed through CDS and OData, extensions placed in the right layer, and side-by-side services on BTP where the core should stay untouched.

Four years of SAP project work across S/4HANA on premise, S/4HANA Cloud Public Edition and BTP, in the areas PPDS, QM, LE, PM, FI and IS-U.

Core Strengths

- ABAP Objects, ABAP SQL, CDS Views and OData v2/v4 as the everyday toolset.
- RAP for in-stack development and CAP with Node.js for side-by-side services on SAP BTP.
- S/4HANA Cloud Public Edition: developer extensibility, key user extensibility and side-by-side extensions.
- SAP UI5 Freestyle and Fiori Elements frontends, plus SAP MII scenarios.
- Clean Core thinking: keeping the core close to standard and making extensions upgrade-safe.
- Web engineering background with JavaScript, TypeScript, React and Node.js, which pays off directly on BTP.

Professional Experience

Senior SAP Developer, intecsoft GmbH & Co. KG **01/2025 to 09/2026**
Dresden, Germany

Senior SAP development role focused on modernization, integration and software quality in S/4HANA projects.

- Improved and extended backend API interfaces in an S/4HANA customer project in SAP PSM (Public Sector Management) to support integration and system readiness.
- Developed and extended the intecsoft SAP solution Collection Sense FI and supported its productive web services and API interfaces during hypercare.
- Refactored an undocumented SAP Business Suite Dynpro application into object-oriented ABAP to improve maintainability and S/4HANA readiness in IS-U.
- Aligned implementation with business teams, solution managers and developers.

Technologies
ABAP Objects, ABAP SQL, CDS Views, OData, SAP BTP, REST, Fiori/UI5, S/4HANA, Clean Core.
